

ABDULAZIZ BAHATTAB

IT Support Specialist - Data Science - Data Analytics – Network

Education

Bachelor Of Science: Information System
King Abdulaziz University - 04/2023

Graduation Project

Optimizing of Email Spam Filtering Performance using Hybrid MLP Neural Network and Ensemble Boosting Learning Approach. at King Abdulaziz University.

- The goal of this project was to create a different strategy utilizing a machine learning classifiers trained on a corpus of email messages from various users using the IBM SPSS Modeler. The selected feature sets have been used in this project to reduce the dimensionality of the datasets to reduce the computational time process of the model that have been build.
- The project focuses on spam emails filtering using the machine learning algorithms with different data collections.

Personal Details

Nationality: Saudi

Marital Status: Single

Phone Number: +966555502754

Email: benmrwan@hotmail.com

Work History

BARISTA, 07/2021 - 07/2022
