

Project Description

StoryHub is a web platform designed for storytellers and readers alike, enabling a community-driven experience where users can publish, share, and interact with stories across various genres. The application emphasizes user engagement through features like story bookmarking, liking, and commenting, alongside a robust user profile system. Story Hub caters to a wide array of literary enthusiasts, providing tools for both amateur and seasoned writers to express their narratives and receive feedback from a vibrant community.

Features List

1. **User Authentication and Profiles:**
 - Secure registration and login processes.
 - Personalized user profiles, where users can add a bio, manage their profile picture, and personalize their account details.
2. **Story Management:**
 - **Create Stories:** Users can create stories, specify categories, upload images, and write content.
 - **Edit Stories:** Authors have the ability to update their stories, change images, and modify content.
 - **Delete Stories:** Authors can remove their stories from the platform.
 - **View Stories:** Stories can be viewed by all visitors, with detailed pages displaying content, author information, and interactive elements.
3. **Interactive Story Features:**
 - **Comments:** Registered users can comment on stories to provide feedback or discuss content.
 - **Likes:** Users can like stories, which helps in recognizing popular content.
 - **Bookmarks:** Users can bookmark stories for easy access later, creating a personalized library of favorites.
4. **Search and Discovery:**
 - Users can browse stories by category or use a search function to find specific content or authors.
 - The homepage features new and trending stories to enhance content discoverability.
5. **Admin Features:**
 - Admin dashboard for managing all users, stories, comments, and site settings.
 - Ability to review user-generated reports on comments or stories, managing community conduct.
6. **Responsive Design:**
 - The website is fully responsive, ensuring a seamless experience on both desktops and mobile devices.
7. **Dark Mode:**
 - Users can toggle between light and dark modes, allowing for a customizable reading experience that suits their preference or ambient lighting conditions.
8. **Contact and Feedback:**

- A contact form allows users to send messages directly to the site administrators, providing feedback or requesting support.
